

wonner

Your global wishlist :3

<https://winner.io>

What is Wonner?

This is a social network, based on the idea of a personal wish list.

Cross-platform (Web, iOS, Android) and intuitive interface.

As well as extensions for known CMS, widgets for websites.

You can easily add loved items from stores to your profile in one touch.

Wonner a universal and convenient solution for a personalized wishlist.

What user can do?

At this stage of development, we implemented the main functional (the publication of desires, the goal list, the marks of already achieved desires) of the project.

And these are some features from our roadmap:

Video Congratulations

Archiving by date

Collective gifts

Wonner.Commerce

Monetization. What is Wonner.Commerce?

Imagine that the user added to his wishes sneakers from Nike or to spend a holiday in Cyprus.

In the special block below will be displayed the optimal options for various criteria for buying sneakers or booking tickets.

This is an excellent opportunity for companies to advertise appropriately and effectively.

Which technologies we use?

All the logic of the project is written on the PHP using the MVC pattern.
Also, for speed and reliability we use Microsoft Azure technology.

Thank you for attention.

See, how it works by yourself. Visit our website:
